Improvement Skillset Training Delivers 150% ROI Increase

Impressed by the positive impact a world leading technology company experienced on projects, with BBI, we were asked to upskill the team to help boost efficiency, productivity and build a culture of continuous improvement.

Our Lean Construction Practitioner Programme

We delivered our Lean Construction Practitioner Programme – fully accredited by Cardiff University's Lean Competency system. This is an immersive course designed to equip you with the skillset, toolset and mindset to streamline your processes and deliver immediate results.

Increased Productivity Reduces Programme Duration

We worked on the first of multiple data centres outside of the UK. Our goal was to improve project controls, increase productivity, reduce programme durations and improve team communication.
